Yeah, most of the write ups in the admin report will be actions on the comms tracker.

Since we are shooting to have the comms tracker input by your Monday meeting, which coincides with the admin report info being due, I would suggest having any admin input sent to Carmen to cc you to add to the comms tracker. That way, doubling effort can be minimized from both sides.

OK – I'll send out a note to remind folks to take a look at the strategy and provide comments. Believe David will be back in the office next week and he may want a quick meeting to discuss etc. so want everyone to have reviewed. Target date is still the 20th as I understand it. Thanks for add' info on the Albuquerque PSD thing – I hadn't rec'd and I'm not really reading through the Administrator's report. Guess I'll need to start doing that. Thanks again.

I have not received any edits, comments etc from XA staff on the DFW ozone comms strategy. But it has gone through program review, so it is good on that side.

I provided this input, for the Alb PSD, which was put into the admin report and Diane has a briefing sheet on it. This is a technical action that did not receive comments, and we do not expect any issues. The original input was a little more in depth.

This is how HQ rewrote it:

On August 18, EPA will finalize the proposed approval of two revisions to the New Mexico State Implementation Plan (SIP) to update the Albuquerque-Bernalillo County Prevention of Significant Deterioration (PSD) SIP permitting program consistent with federal requirements.

This was my original input, if you want more:

On August 18, EPA intends to finalize our proposed approval of the approve two revisions to the New Mexico State Implementation Plan (SIP) to update the Albuquerque-Bernalillo County Prevention of Significant Deterioration (PSD) SIP permitting program consistent with federal requirements. New Mexico submitted revisions that included request for parallel processing of the submitted 2015 revisions. EPA granted this to expedite our final approval. These submittals contain revisions to address the requirements for the PM 2.5 PSD Implementation Rules and to incorporate revisions consistent with the Fugitives Interim Rule, Greenhouse Gas (GHG) Biomass Deferral Rule, and GHG Tailoring Rule Step 3 and GHG PALs Rule. We did not receive comments on our proposal and do not expect any negative reaction from our final decision. The EPA is not approving these rules within the exterior boundaries of a reservation or other areas within any Tribal Nation's jurisdiction.

Ok appreciate the clarification. Still learning how to discern who is doing what etc. Have you gotten any comments from folks about the comms strategy? Also, have you had a chance to talk with PD regarding the Albuquerque PSD Update entry on the comms tracker (line 16)? Let me know what you find out and especially if no action is anticipated being needed so I can update. Thanks.

I had two entries under liaison for 8/12:

Received inquiry from NM AG's office on a request for meeting. Coordinating with HQ and JIC for Gold King Mine response

Attempted to coordinate with Rep. Lujan's office and the JIC on the congressman's late arrival for press event today.

I also worked with David and Carmen on my usual duties providing congressional contacts.

I did see your entry about the DFW nonattainment comms strategy but didn't see any stuff in the liaison area (that I could identify with you) so I thought you may still be flaking in and out etc.

No. I had it fixed and put my update in yesterday.
